Canadian Longitudinal Study on Aging (CLSA)

- More than 160 researchers – 26 institutions
- Multidisciplinary – biology, genetics, medicine, psychology, sociology, demography, economics, epidemiology, nursing, nutrition, health services, biostatistics, population health
Funders & Partners

- Strategic initiative of the Canadian Institutes of Health Research (CIHR)
- Funded by CIHR and the Canada Foundation for Innovation (CFI)
- Provinces and universities across Canada
Our Vision

A research platform – infrastructure to enable state-of-the-art, interdisciplinary population-based research and evidenced-based decision-making that will lead to better health and quality of life for Canadians.
Our Aim

To study aging as a dynamic process and the inter-relationship among intrinsic and extrinsic factors from mid-life to older age.
Selected Research Goals

- The progression of health from middle age to early old age to older old age
- The determinants of well-being and quality of life
- Social participation, social relationships and caregiving in an aging population
- The examination of socioeconomic and health inequalities in an aging population
- Retirement and post-retirement labour market activity
- Cognitive functioning and mental health
- Disability and the compression of morbidity
Selected Research Goals

- Risk factors (including genetics) of chronic diseases:
  - Cardiovascular
  - Cerebrovascular
  - Neurological
  - Respiratory
  - Vision and Hearing
  - Renal
  - Metabolic
  - Cancer
  - Osteoarthritis
  - Diabetes
  - Musculoskeletal
  - Depression
National Scope

Maintaining Contact Questionnaire:
All sites (every 18 months)

- Home Interviews & Data Collection Site Visits
  Recruitment & follow-up

- Telephone Interviews
  Recruitment & follow-up
Depth and Breadth of the CLSA

PHYSICAL & COGNITIVE MEASUREMENTS

- Height & weight
- Waist and hip measurements
- Body composition
- Arterial pressure
- Heart rate
- ECG
- Grip strength
- Timed up-and-go
- Chair rise, 4-m walk
- Standing balance
- Vision
- Hearing
- Spirometry
- Bone density
- Aortic calcification
- Carotid intima-media thickness
- Cognitive assessment
Depth and Breadth of the CLSA

PSYCHOSOCIAL

- Social participation
- Social networks and support
- Caregiving and care receiving
- Mood, psychological distress
- Satisfaction with life
- Wealth
- Personality traits

- Work-to-retirement transitions
- Veteran identifier/PTSD
- Retirement planning
- Social inequalities
- Mobility-lifespace
- Built environments
Depth and Breadth of the CLSA

HEALTH INFORMATION

- Chronic disease and symptoms
- Medication and supplement use
- Women’s health
- Self-reported health service use
- Oral health
- Administrative data linkage health services and drugs
- Other administrative databases
- General health
- Injuries
- Pain/discomfort
- Functional status
- Activities of daily living (ADL)
- ADL impairment

Photo: Health Canada
Depth and Breadth of the CLSA

LIFESTYLE &
SOCIODEMOGRAPHIC

- Smoking
- Alcohol consumption
- Physical activity
- Nutrition
- Birth location
- Ethnicity/race/gender
- Marital status
- Education
- Income
- Transportation
- Home ownership
Study Overview

50,000 women and men aged 45 - 85 at baseline

n=20,000
Randomly selected within provinces

n=30,000
Randomly selected within 25-50 km of 11 sites

Questionnaire
• By telephone (CATI)

Questionnaire
• In person, in home (CAPI)

Clinical/physical tests
• Blood, urine (consent)
• At Data Collection Site

Interim contact, follow up every 3 years

Data Linkage (consent)
Participants provide questionnaire data (n=50,000)

Recruits consent to participate in the CLSA

Randomly selected adults aged 45-85 sent study information

Home interview and data collection site visit (n=30,000)

Telephone interview (n=20,000)
CLSA Data Collection
Telephone Interviews

Sites conduct telephone interviews

Participants provide questionnaire data (n=20,000)
CLSA Data Collection
Home Interview and Data Collection Site Visit

Participants provide questionnaire data in a home interview (n=30,000)

Participants visit one of 11 data collection sites (n=30,000)
CLSA Data Collection
At the Data Collection Site

Physical Data Collected
- Bone Density, Body Composition
- Aortic Calcification
- ECG
- Carotid Intimal-Medial Thickness
- Pulmonary Function
- Vision and Hearing

Biological Data Collected
- Blood
- Urine

Psychological Data Collected
- Neuropsychological Battery
- Performance Testing
- Anthropometric Measures

For more Information visit www.clsa-elcv.ca
Biospecimen Room
Collection, processing, analysis

- 5 – 6 participants per day
- 50 mL blood
- Urine sample
- Hematology tests
- Collection to storage time – 2 hours

AcT DIFF, Beckman Coulter
Biospecimen processing
42 aliquots per participant
CLSA Data Processing

1. Telephone interview (n=20,000)
2. Home interview and data collection site visit (n=30,000)
3. Questionnaire data processed
4. Blood and urine stored in Biorepository and Bioanalysis Centre (BBC)
5. Linkage to administrative data with consent

Data stored in National Coordinating Centre/Statistical Analysis Centre (NCC/SAC)
Recruitment & Data Collection

Telephone Interviews

- Recruitment of 20,000 participants for telephone interviews:
  - Statistics Canada CCHS on Healthy Aging
  - Provincial Health Care Registries
  - Random Digit Dialing
- Baseline data collection 2010 to 2014
- Maintaining contact interviews initiated 2013
- First follow-up begins 2015
Recruitment & Data Collection
Home Interviews and Data Collection Site Visits

- Recruitment of 30,000 for Home Interviews and Data Collection Site Visits:
  - Provincial Health Care Registries
  - Random Digit Dialing
- Baseline data collection 2012 to 2015
- Maintaining Contact Interviews initiated 2014
- First follow-up begins 2015
CLSA Infrastructure
11 Data Collection Sites
CLSA Infrastructure
4 Telephone Interview Centres
CLSA Infrastructure
4 Enabling Units

National Coordinating Centre (NCC)
Director: Parminder Raina

Biorepository and Bioanalysis Centre (BBC)
Director: Cynthia Balion

Genetics and Epigenetics Centre (GEC)
Directors: Michael Kobor and Michael Hayden

Statistical Analysis Centre (SAC)
Director: Christina Wolfson
CLSA by the Numbers

- 50,000 participants
- 20 years to complete the study
- Capacity for:
  - 140,000 telephone interviews
  - 210,000 home interviews
  - 210,000 visits to data collection sites
  - 5 million biospecimen aliquots
  - 300,000 follow-up calls
- 126 million questions will be asked during telephone interviews
- 300 million data points will form the CLSA research platform
CLSA Governance Structure

CIHR Advisory Committee on Ethical, Legal and Social Issues

Scientific Advisory Board

CLSA Advisory Council

Scientific Management Team

Data and Sample Access Committee

Intellectual Property and Commercialization Committee

Operations Committee

Training and Research Capacity Committee

Knowledge Translation and Communications Committee

CIHR Oversight
Data and Biospecimen Access

- Data and biospecimens available to the research community
- Fundamental tenets:
  - The rights, privacy and consent of *participants* must be protected and respected at all times
  - The confidentiality and security of *data and biospecimens* must be safeguarded at all times
  - CLSA data and biospecimens are resources that will be used optimally to support research to benefit all Canadians.
What is the process to access data?

- 20,000 telephone interviews: anticipate data to be available mid-2014
- Application process via CLSA website portal
- Review: Administrative, Data and Sample Access Committee recommendation
- Approval, data/biospecimen sharing agreements
- Raw data and/or biospecimens to investigator
- Return of derived variables to CLSA dataset
CLSA Partners

- PHAC for Neurological Conditions Initiative
- PHAC for Injury Initiative
- Veterans Affairs (Veterans Health Initiative)
- Statistics Canada
- Ontario Ministry of Health and Long-Term Care Provinces
- Universities
- Large number of in-kind contributions from vendors and suppliers
