

# Showcasing the CLSA research platform

Latest updates on data  
collection, data availability  
and data access

May 27, 2025

# Overview

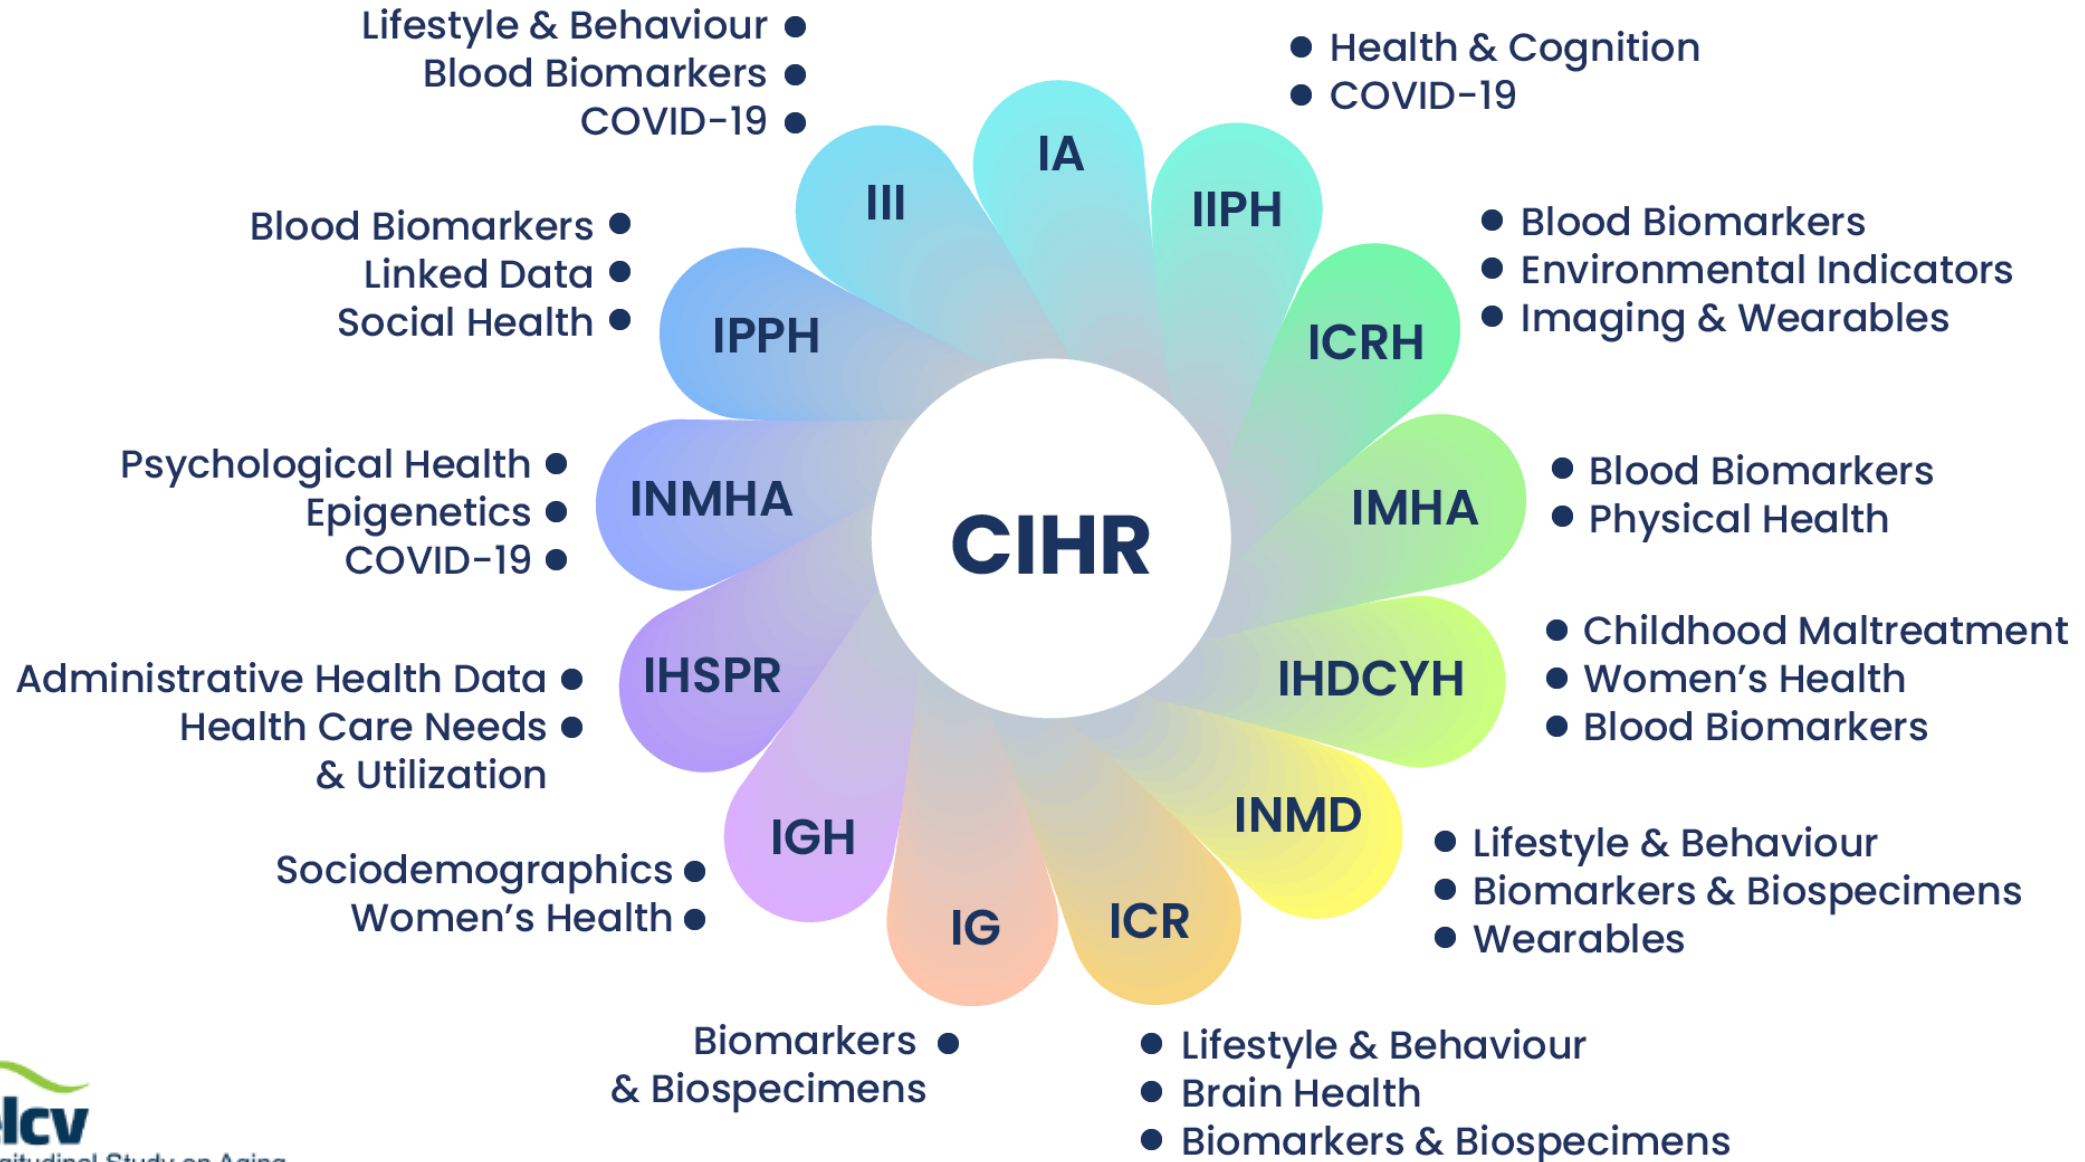

- CLSA Research Platform
- Data Availability
- Data Access

# What is the Canadian Longitudinal Study on Aging?

A group of six diverse older adults, three women and three men, are smiling and posing outdoors in front of a background of bright pink flowers. The group includes a Black woman on the far left, a white woman with glasses, a white man with glasses, a woman with short grey hair and glasses, a man with grey hair, and a woman with reddish-brown hair on the far right. They are all dressed in casual clothing like t-shirts and a jacket.

**A research platform** – Infrastructure to enable state-of-the-art, interdisciplinary population-based **research** and **evidenced-based** decision-making that will lead to better health and quality of life for Canadians.

# Alignment of CLSA Data with CIHR Institutes

# CLSA Research Platform

51,338 participants aged 45 - 85 at Baseline

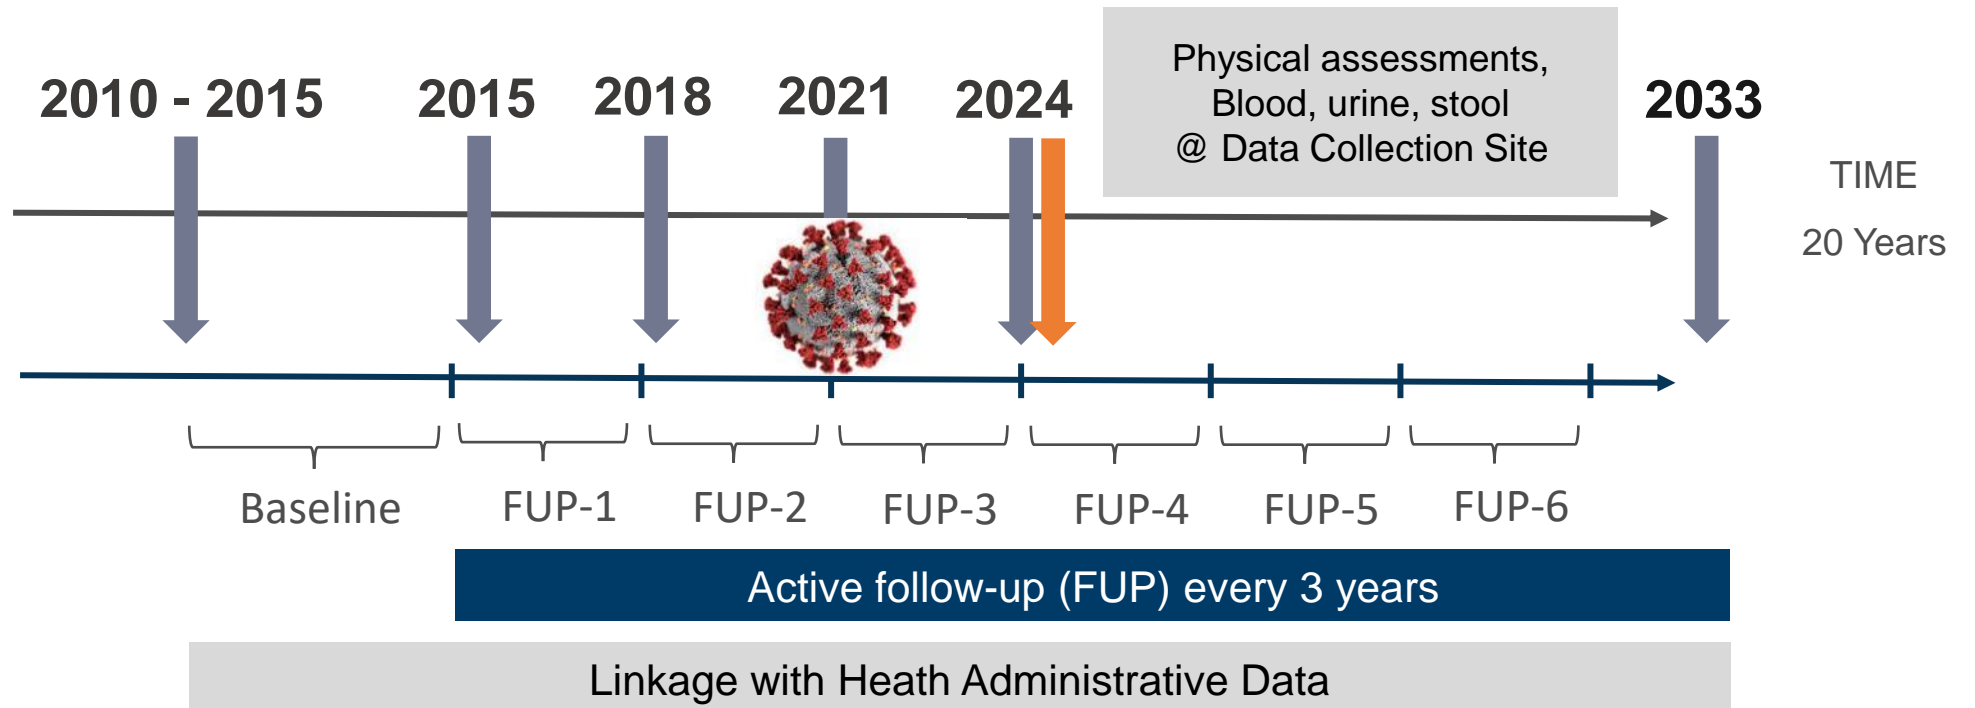

**CLSA Tracking**  
21,241 participants

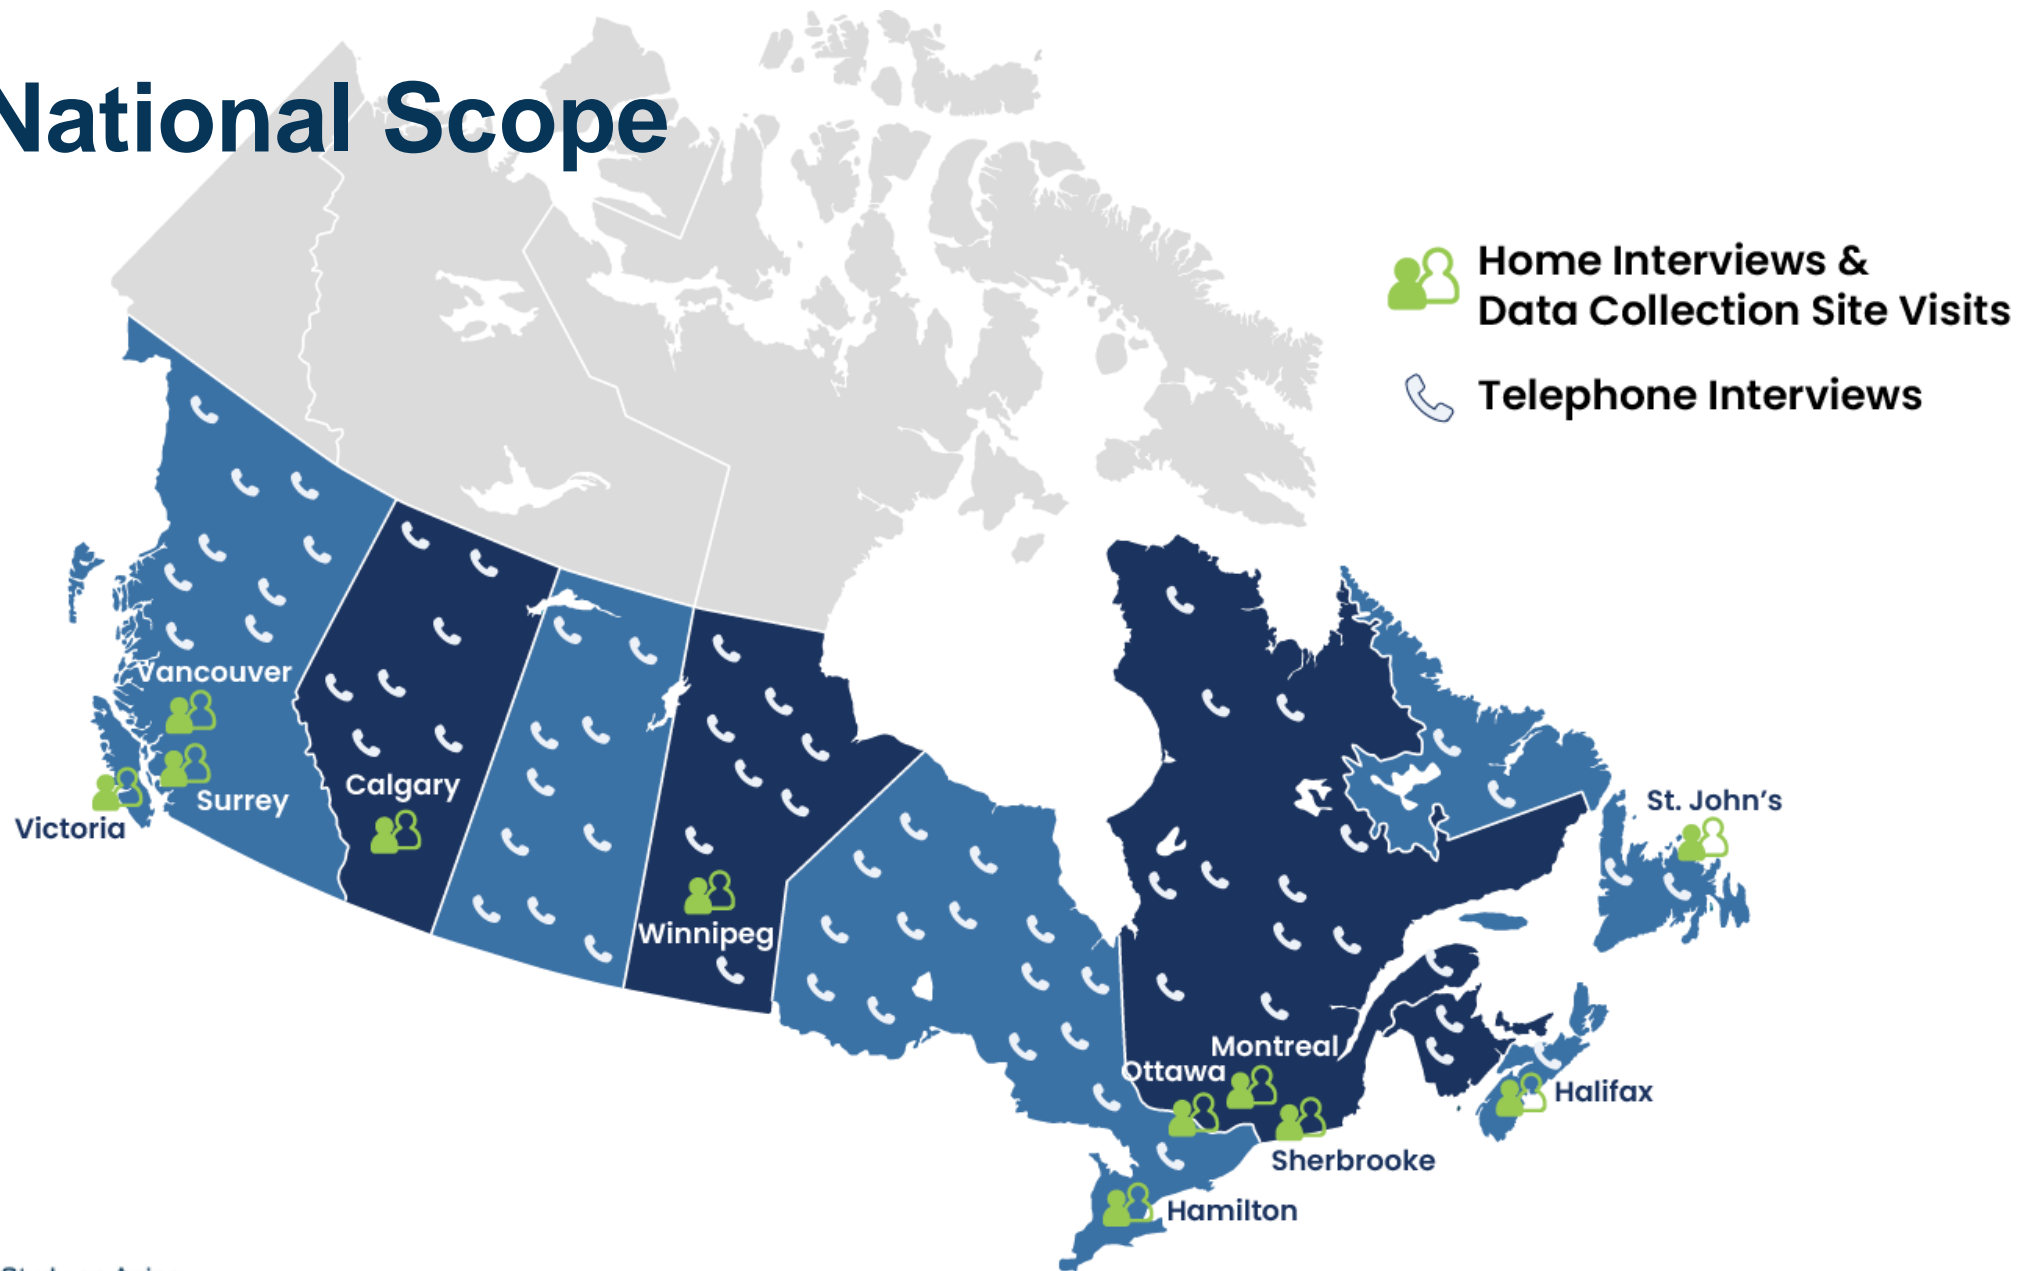

**CLSA Comprehensive**  
30,097 participants

Questionnaire  
By telephone (CATI)

Questionnaire  
In person, in home (CAPI)

# National Scope

# CLSA Network of Collaborating Institutions

a place of mind  
THE UNIVERSITY OF BRITISH COLUMBIA

# Data Collection through Questionnaires

- Answer a variety of questions on physical, social and psychological health
- Questions largely remain the same, but new content has been added

## Supplemental Questionnaire

- Web-based
- Healthy Sexuality
- Family History
- Chronic Conditions (CHF & arrhythmia)
- All participants

## Ageism Experiences

- Additional questions
- All participants

## Cannabis Use

- Additional questions
- All participants

Introduced in Follow-up 3

Introduced in Follow-up 4

# CLSA In-Person Data Collection

## Data Collection Site

### Physical Assessments

- Height, Weight
- Bone Density, Body Composition, Aortic Calcification
- Blood Pressure
- ECG
- Echocardiogram **NEW**
- Carotid Intima-Media Thickness
- Pulmonary Function
- Vision & Hearing
- Contrast Sensitivity **NEW**
- Olfactory **NEW**
- Performance testing
- Wearables **NEW**

### Biospecimen Collection

- Blood
- Urine

### Cognitive Assessments

- Memory
- Executive function
- Reaction time

Introduced in Follow-up 3

Introduced in Follow-up 4

# FUP3 New Measures Wearables

## Sleep Trackers

- Muse headband
- ActiGraph (wrist)
- Sleep quality (e.g., duration, fragmentation, efficiency)
- EEG for sleep architecture
- Comprehensive participants (N=2,630)

## Mobility Trackers

- GPS and triaxial accelerometer devices:
  - TicWatch
  - ActiGraph (thigh)
- Physical activity and sedentary behaviour
- Community mobility (e.g., driving)
- All Comprehensive participants

# CLSA-Weston Healthy Brains, Healthy Aging Initiative (HBHA)

## Began in September 2022

- Brain health initiative funded by the Weston Family Foundation
- 6,000 Comprehensive participants
- MRIs & fecal samples (N=2,250)
  - Additional cognitive measures, sleep, and handedness
- Fecal samples only (N=6,000)
- Two data collection events

Canadian Longitudinal Study on Aging  
Étude longitudinale canadienne sur le vieillissement

# Dementia Disease Ascertainment Pilot

- Study funded through PHAC's Enhanced Dementia Surveillance Program
- Data collection: August 2022 – March 2024
- N= 597
- Estimate of undetected dementia in Canada by:
  - Validating CLSA dementia algorithm with clinical assessments\*
  - Linking CLSA data with provincial health-care databases

\*Outcome (major neurocognitive disorder) based on validated CLSA dementia algorithm will become part of the core CLSA dataset

### NEW at FUP2 and FUP3

- Weight perception
- Resiliency scale
- Aortic Valve Stenosis
- Munich ChronoType Questionnaire

- Generalized Anxiety Disorder
- Positive Mental Health
- Intimate Partner Violence
- Elder Abuse Suspicion Index

- Quality of Life

# Physical Assessments

## Baseline & Follow-ups 1-3

- Weight and Height
- Body Mass Index
- Hip and Waist
- 4-Metre Walk
- Timed Get Up and Go
- Standing Balance
- Chair Rise: Balance and Coordination
- Grip Strength
- Pulse Rate and Blood Pressure
- Body Composition
- Basic Activities of Daily Living
- Instrumental Activities of Daily Living
- Functional Status
- Life Space Index
- Spirometry
- Hearing
- Canadian Digit Triplet Test
- Visual Acuity
- Tonometry
- Electrocardiogram
- Carotid Intima Media Thickness \*
- Bone Density by DEXA:
  - Dual Hip
  - Forearm
  - Whole Body

# Core Biomarkers: Baseline & Follow-ups 1-3+

	Category	N*	Wave	Biomarkers
OMICS	<b>GENETICS</b> Genetic and Epigenetic Centre (GEC)	26,622	Baseline	<ul style="list-style-type: none"><li>Genotypes (Affymetrix Axiom array, 794k SNPs)</li><li>Imputation (Haplotype Reference Consortium release 1.1, 39.2M SNPs)</li></ul>

# Data Access

# CLSA Data Access

- Data available to researchers and trainees based in academic settings and research institutes in Canada and elsewhere
- **Application deadlines:**
  - July 9, 2025
  - October 1, 2025
  - January 14, 2026
  - April 8, 2026
  - July 8, 2026
  - October 7, 2026
- For more information on the access process, please consult our website: [www.clsa-elcv.ca/data-access](http://www.clsa-elcv.ca/data-access)

# Data Access Process

**Applicants advised to plan on receiving data  
six months after submission deadline**

# Special Considerations: Applying to access Indigenous-identifiers in Magnolia

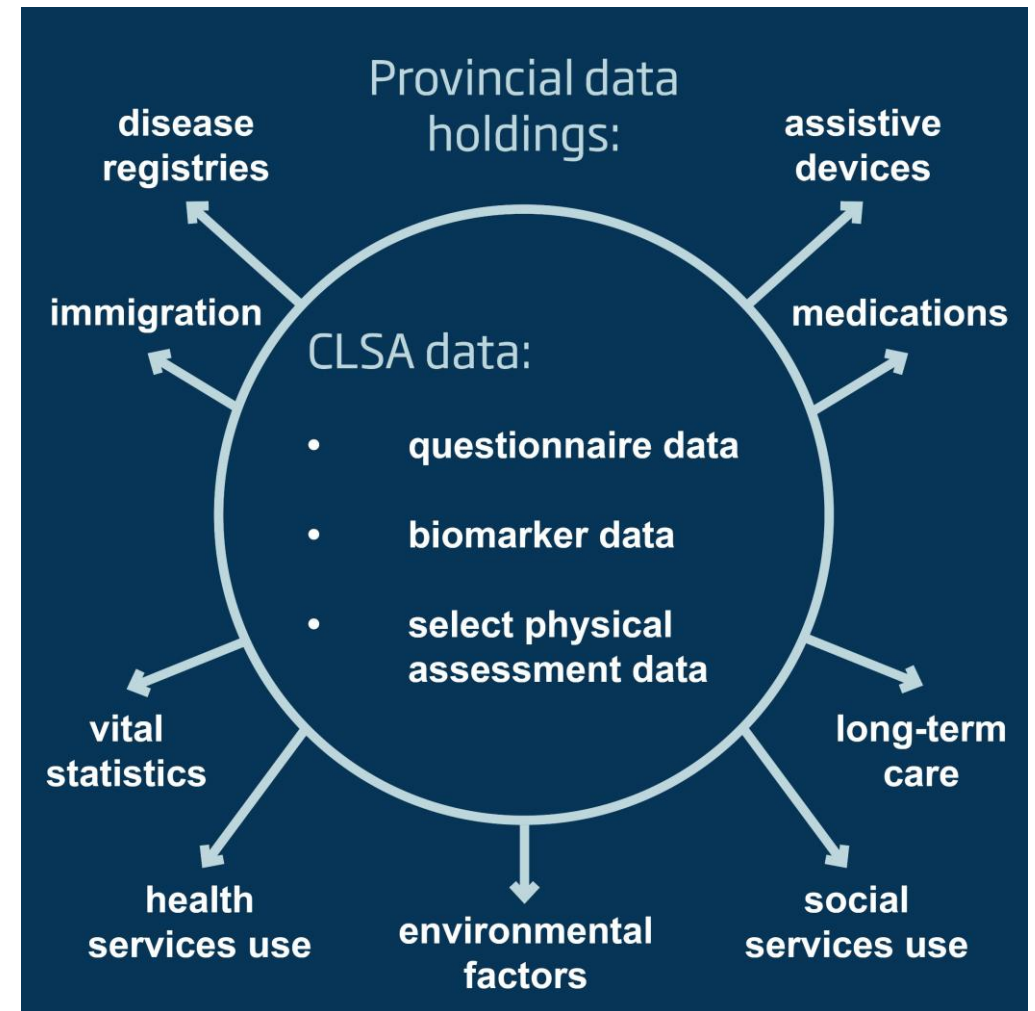

- When proposing a project using/reporting on Indigenous identifiers, applicants must describe meaningful and respectful engagement with relevant Indigenous People
- Meaningful and respectful engagement =
  - Conduct work in service to community that supports community priorities
  - Respect existing Indigenous governance protocols
  - Recognize and promote sovereignty by ensuring Indigenous direction and governance throughout
  - Centre Indigenous values and communities in knowledge sharing
  - Strengthen and build data capacity within communities
  - Build on strengths, not deficits

# Data Linkage

## Administrative Health Data

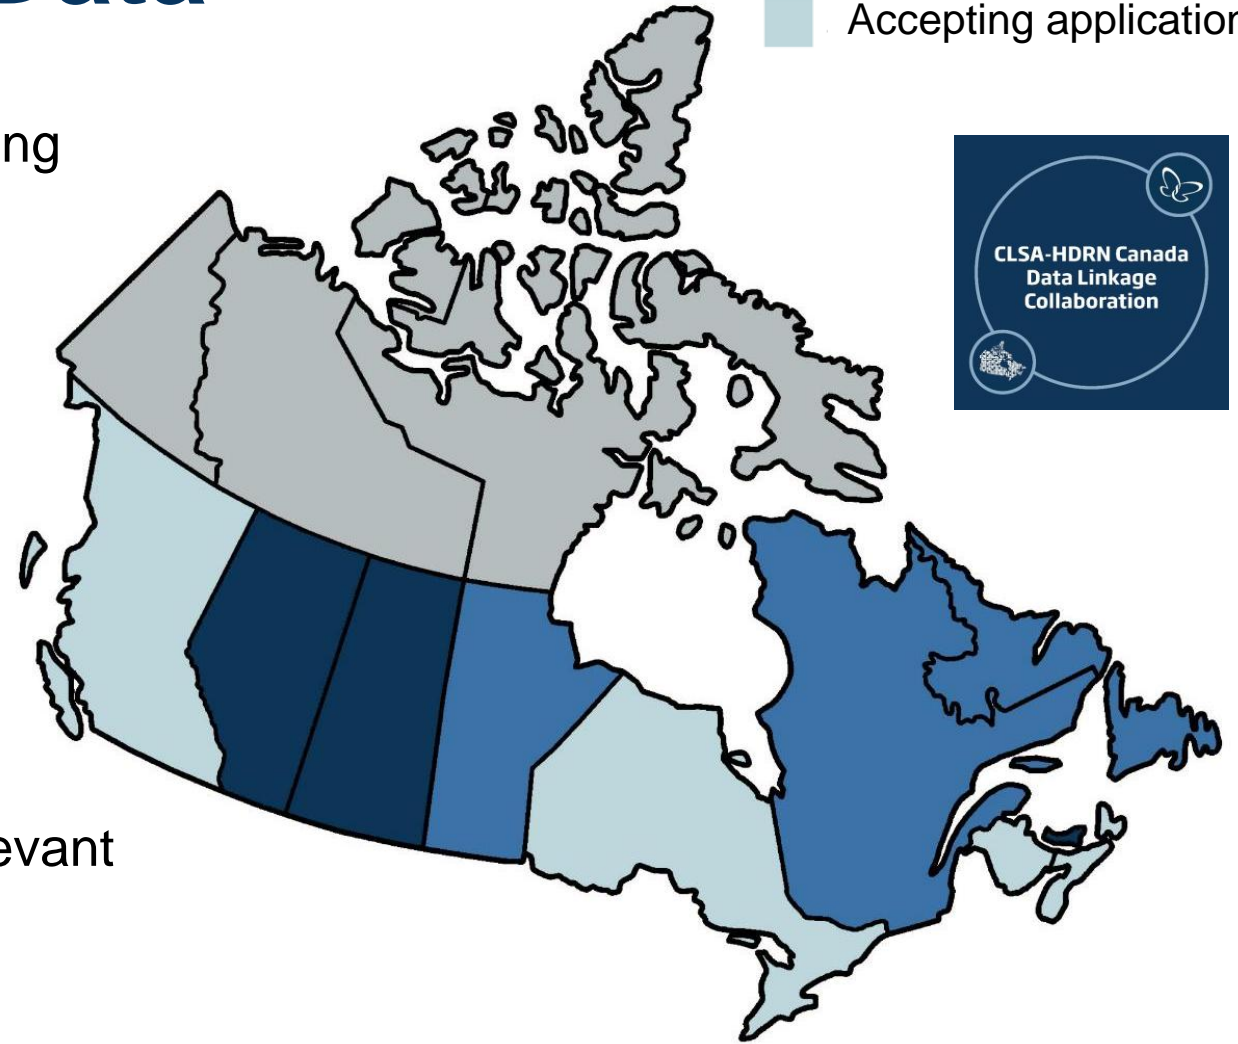

- Linkage of CLSA data with multiregional provincial health data
- Provides opportunity to explore the intersection between aging and health-care utilization
- 92% (n=47,230) of CLSA participants provided consent to linkage
- Initiated a collaboration with Health Data Research Network (HDRN) Canada and its partners in 2021

# Administrative Health Data

- Initial discussions
- Under review
- Accepting applications

- Four provincial data centres currently accepting applications:
  - Population Data BC
  - ICES (Ontario)
  - New Brunswick Institute for Research, Data and Training (NB-IRDT)
  - Health Data Nova Scotia (HDNS)
- Multi-region requests facilitated through HDRN Canada's Data Access Support Hub (DASH): [www.hdrn.ca/dash](http://www.hdrn.ca/dash)
- Single-region requests facilitated through relevant provincial data centre

## Documentation

- Data Access Policy & Guidelines
- Protocols, Cohort Profile & Reports
- Questionnaires
- Physical Assessments
- Data Dictionaries
- Sampling Weights Documents
- Derived Variables
- Data Support Documents
- Data and Biospecimens Documents
- [www.clsa-elcv.ca/researcher-resources](http://www.clsa-elcv.ca/researcher-resources)

## CLSA Webinars

- Monthly from September to June
- 100+ recordings and slides are posted on the CLSA website, including:
  - Data access webinars on linked data, considerations for the access/use of Indigenous-identified data, CLSA sampling weights and more.
- [www.clsa-elcv.ca/webinars](http://www.clsa-elcv.ca/webinars)

## DataPreview Portal

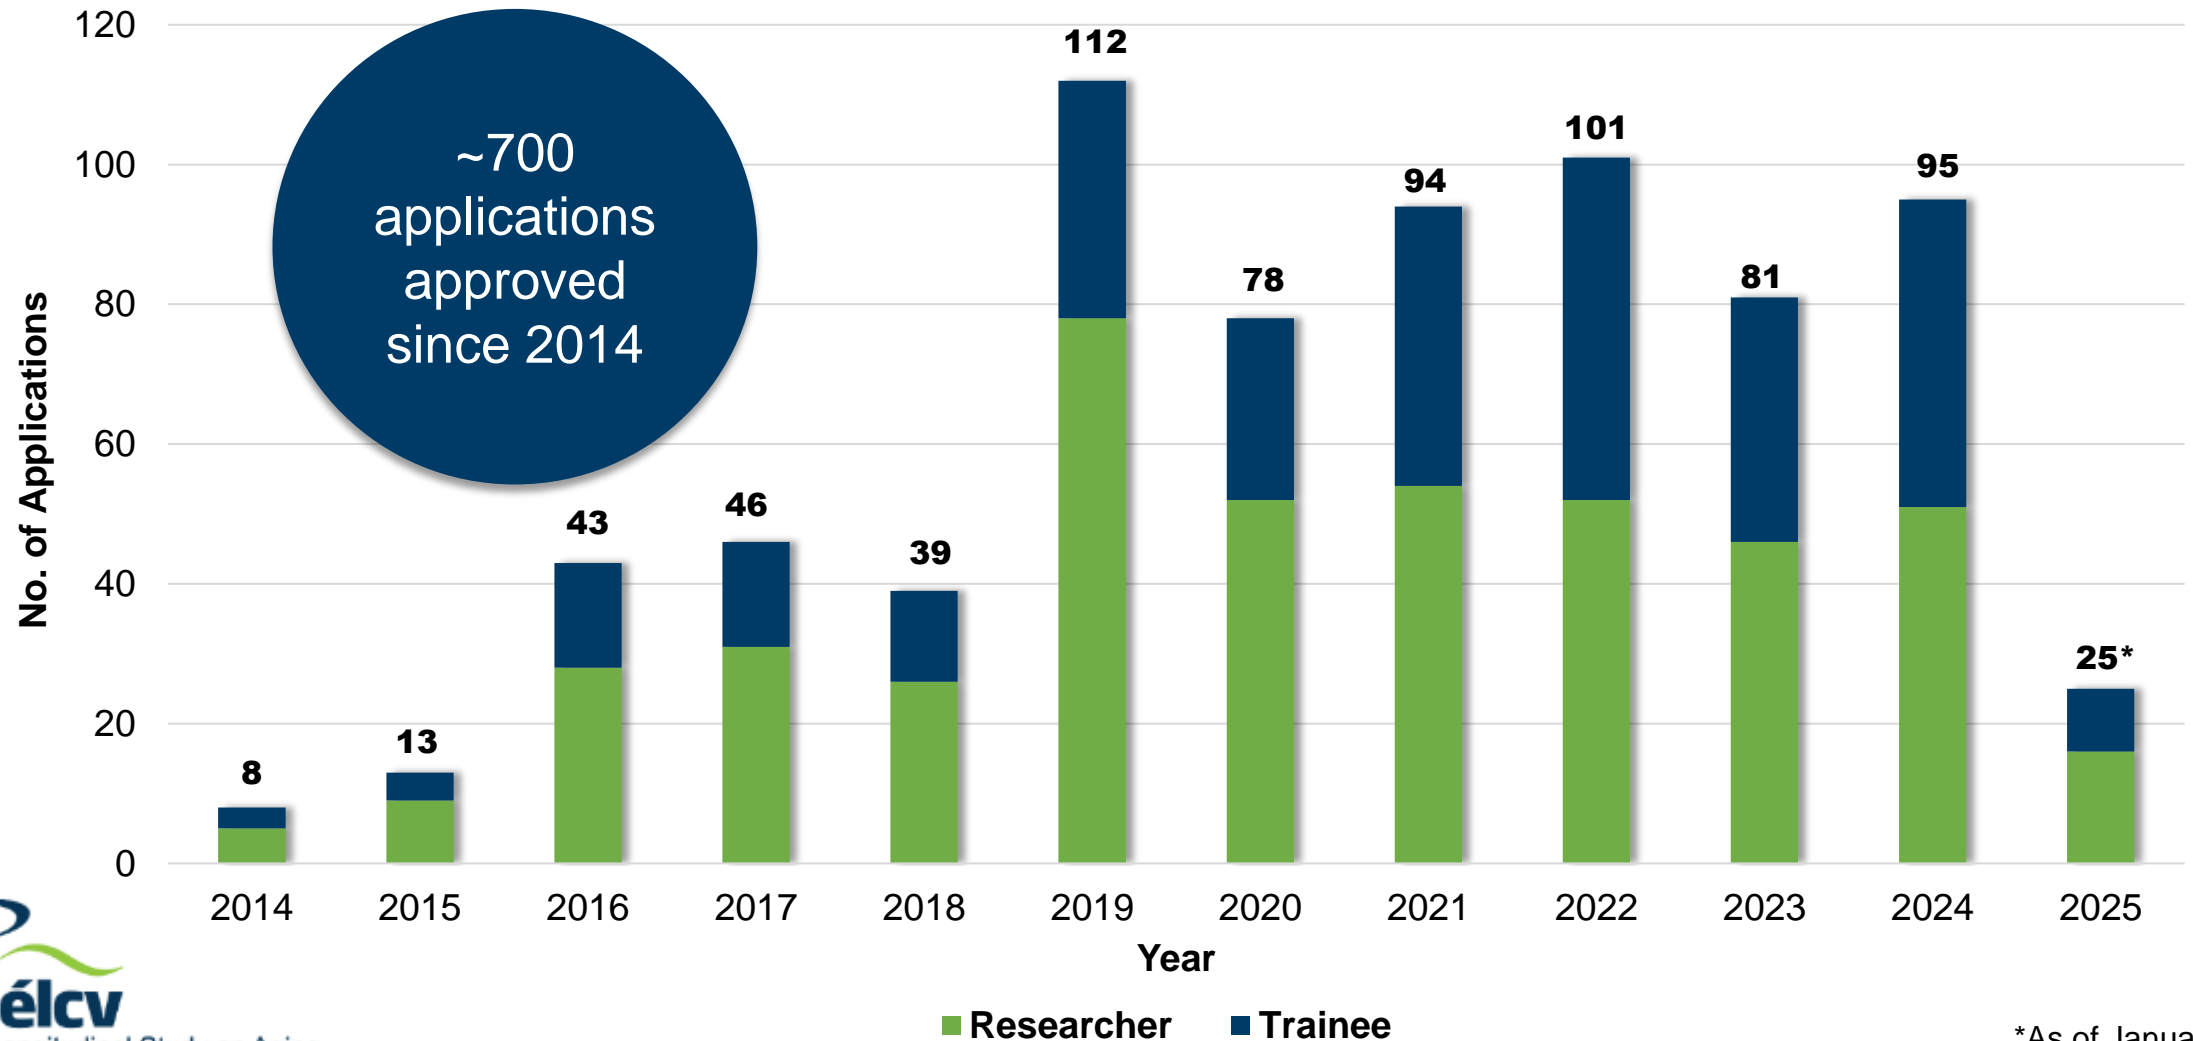

- Summary statistics
- Explore data:
  - Variable by variable
  - Scales & measures
  - Areas of Information
- [www.clsa-elcv.ca/data-preview-portal](http://www.clsa-elcv.ca/data-preview-portal)

## Approved Projects & Publications

- Lay summaries of all approved projects
- Database of 500+ peer-reviewed publications
- Search engine
- [www.clsa-elcv.ca/approved-projects](http://www.clsa-elcv.ca/approved-projects)
- [www.clsa-elcv.ca/publications](http://www.clsa-elcv.ca/publications)

**Data access support & inquiries: [access@clsa-elcv.ca](mailto:access@clsa-elcv.ca)**

**General inquiries: [info@clsa-elcv.ca](mailto:info@clsa-elcv.ca)**

CLSA is funded by the Government of Canada through CIHR and CFI, and provincial governments and universities. Brain health research funding provided by the Weston Family Foundation.  
Past funding includes: COVID-19 Immunity Task Force, Juravinski Research Institute, McMaster University, McMaster Institute for Research on Aging, Nova Scotia COVID-19 Health Research Coalition and the Public Health Agency of Canada.

**Thank you to the study participants and CLSA team for their valuable contributions!**

# Images & Raw Data

	Baseline	FUP1	FUP2
<b>Images and raw data</b> (cIMT, DXA, ECG, Retinal scans, Spirometry, Tonometry, Raw cognition)	✓	✓	To be determined

- To request these data: applicants need to provide detailed justification explaining how these data will help to achieve proposed objectives and describe how they will be analyzed
- Users need to have the expertise and resources to work with these types of data
- The request for images and raw data usually incurs additional costs beyond the current data access fee
- It may take longer to receive these data

# Magnolia Enhancements

# Manuscript submission process

- CLSA data users must now submit final drafts of manuscripts for review through Magnolia
- Final drafts of **all primary research outputs** must be submitted for review including: submissions to preprint servers, manuscripts, reports, and other types of media using CLSA data and/or biospecimens
- Drafts of abstracts, posters, and presentations do not need to be sent to the CLSA for review, but should follow the Guiding Principles outlined in the CLSA Publication and Promotion Policy

# How do I submit a manuscript in Magnolia?

- Access Magnolia through the CLSA website
- Open the relevant application
- Navigate to the tab labelled “Manuscripts” (to the right of Part 3 of the application) and add the document

The screenshot shows the CLSA website interface. At the top, there is a navigation bar with links: Trainees, Researchers (with a dropdown arrow), Resources (with a dropdown arrow), About (with a dropdown arrow), and News. A dark blue button labeled "CONTACT" is positioned to the right of the navigation bar. Below the navigation bar, a blue dropdown menu is open under the "Researchers" link, displaying four options: Data Access, Data Preview Portal, Data Availability, and Magnolia. A dark blue arrow points to the "Magnolia" option. Below the dropdown menu, there is a horizontal tab bar with five tabs: Instructions, Part 1, Part 2, Part 3, and Manuscripts. The "Manuscripts" tab is highlighted with a red circle. Below the tab bar, the text "Instructions for completing an application" is displayed. A light blue box contains the following text: "Please note that the CLSA **only accepts applications for data that are available at the time of submission**. To know what data are currently available, please consult the data that are not available at the time of submission will not be considered for review, and you will need to reapply once those data become available."

# How do I submit a manuscript in Magnolia?

- The submitted document will then appear in your Manuscript List when logging in.

Magnolia / Home Applicant @ NCC 10:37am EDT

automatiquement. Vous pouvez modifier votre demande à tout moment. Lorsque la demande est finalisée et que vous êtes prêt à la soumettre, cliquez sur le bouton « Soumettre ». Une fois la demande soumise, vous recevrez un courriel de confirmation de votre soumission. Les demandes complètes, mais qui n'ont pas été soumises ne seront pas évaluées.

### Messages

☒ Note to Applicant

SPECIAL NOTE: Catalyst Grant: Analysis of Canadian Longitudinal Study on Aging (CLSA) Data:  
\*\* If you have been awarded a CIHR catalyst grant please contact us at [access@clsa-elcv.ca](mailto:access@clsa-elcv.ca) for next steps. DO NOT create a new application in Magnolia.\*\*  
\*\* Si vous avez reçu une subvention Catalyseur des IRSC veuillez nous contacter à [access@clsa-elcv.ca](mailto:access@clsa-elcv.ca) pour les prochaines étapes. NE PAS créer une nouvelle application dans Magnolia. \*\*

For ALL data access applications:

- The primary applicant must hold an eligible appointment (continuing or term appointment) at an eligible institution (that is able to uphold the conditions of the data access agreement, administer grant funds, and provide Research Ethics Board approval).
- Failure to provide the level of detail sufficient to assess the study feasibility could lead to the application being not approved.
- Once you have begun the application process, it is your responsibility to check your email (including your folders for junk, spam, etc.) for notifications from Magnolia ([access@clsa-elcv.ca](mailto:access@clsa-elcv.ca), [no-reply@clsa-elcv.ca](mailto:no-reply@clsa-elcv.ca)).
- When you submit your application you will NOT receive confirmation that it has been submitted. Once you log into Magnolia you will see your new application in your 'Requisition List'.

### Requisitions List

0 manuscripts total		

# Amendments in Magnolia

- Approved users must keep the CLSA updated on any changes that affect your data access agreements:
  - Have you moved institutions?
  - Has the research team changed?
  - Has a trainee graduated or moved to a new position?
- Request an amendment through Magnolia
- Having trouble submitting an amendment request or if you have any questions concerning amendments? Reach out to **[access@clsa-elcv.ca](mailto:access@clsa-elcv.ca)**
